

Lavanya Shahapur

Computer Science and Engineering Student

6361242771

shahapurlavanya@gmail.com

PROFILE

Highly motivated professional who works well independently and in teams to achieve goals. Eager to embark on a journey of growth and collaborative achievement in the realm of computer science engineering

TECHNICAL SKILLS

- C
- C++
- Python
- OOPs
- Database Management
- Machine Learning
- Operating Systems
- Computer Networks

CERTIFICATIONS

JUNIPER NETWORKS | AUG 2023

Online Training and Certification on JNCIA-Junos

LANGUAGES

- Kannada
- English
- Hindi

INTERESTS

- Music (Vocals)
- Dance
- Badminton

EDUCATION

BE (Computer science and Engineering)| 2020- 2024

KLE Technological University, Hubballi

9.05 (CGPA till 7th sem)

Pre - University | 2018-2020

Alva's PU College , Moodbidri, Dakshina Kannada

96.83%

High School | 2015 - 2018

Alva's English Medium High School, Moodbidri

99.52 %

PROJECT DETAILS

Performance Evaluation of Quality of Service using dynamic RAN slicing in 5G Networks | Nov 2022

Virtually evaluated the QoS received by the users for the services deployed on the dynamic slices in the 5G network using eXP-RAN

Reduction of Power Consumption using Massive MIMO and Small Cells in 5G Networks | May 2023

Virtually simulated the network consisting of massive MIMO and small cells with an objective of reducing the power consumption while meeting the QoS requirements of the users dynamically

Sentiment Analysis for low resource African languages using Twitter Dataset | Nov 2022

The African languages tweets were sentimentally analysed and classified into positive, negative and neutral labels using different machine learning algorithms

RESEARCH AND PUBLICATIONS

Presented the Research Paper on the Performance Evaluation of Quality of Service using dynamic RAN slicing in 5G Networks at : ERCICA 2023 hosted by the NMIT, Bengaluru.

COMPETITIONS

Participated in the WIDS Datathon 2023 challenge held online on the kaggle platform which involved long term weather forecasting for the given dataset.
